EDUCATION

National Chengchi University

Taipei, Taiwan

BS in Management Information Systems

Sep. 2023-June 2027 expected

- Overall GPA: 4.16/4.3
- Relevant coursework: Calculus, Statistics, Data Structures, System Designing, Database Management Systems, Artificial Intelligence
- Academic Excellence Award (Dean's List), Fall 2025
- NCCU EMI Course Incentive Scholarship (16 credits of English-Medium Instruction courses), 2026
- Telamon AI Scholarship, National Chengchi University, awarded for excellence in the AI Interdisciplinary Micro Program, 2026

EXPERIENCE

Cathay Securities Investment Trust

Taipei, Taiwan

Summer Internship, Digital Development Intern

July 2026-Present

- Designed an AI-assisted fund reporting workflow that converts 20–30 heterogeneous monthly fund PDFs into 400+ standardized Excel fields in approximately 20 minutes using Python, AI review, and validation pipelines.
- Analyzed 65,000+ enterprise ChatGPT interaction records to identify departmental usage trends and credit concentration, presenting key findings and visualizations to 50+ employees
- Led Codex training at headquarters, independently developing materials on Skills, automation, VS Code integration, and credit-efficient usage for employees across multiple business functions.

Deloitte Taiwan

Taipei, Taiwan

Semester Internship, Technology & Transformation Intern

Feb. 2026-June 2026

- Developed and tested a cloud security platform, ensuring the reliability and accuracy of AI-generated security analysis and reporting outputs.
- Designed front-end report outputs and implemented email automation features to improve report delivery, readability, and workflow efficiency.
- Supported multi-cloud log normalization across AWS, Azure, and GCP, enabling consistent security analysis and strengthening understanding of cloud security architectures.

HCT Logistics

Taipei, Taiwan

Summer Internship, Information Technology

July 2025-Aug. 2025

- Redesigned and deployed 4 corporate website pages, including the homepage, thank-you page, company introduction, and supply chain page, with responsive layouts optimized for mobile and tablet viewing.
- Built front-end UI interactions with HTML/CSS/JavaScript, including button-state color changes and animated login indicators, to create a more modern website interface.
- Corrected SQL filtering logic for AR/AP daily operational queries involving monthly order numbers and sender records, consolidated three charts into a single dynamic query view, and enhanced internal TMS order inquiry and tracking interfaces for mobile display and testing needs.

RELEVANT PROJECTS & COMPETITIONS

Revisiting the Lost Village: MR × AI Interactive Reconstruction of Submerged Cultural Landscapes, NSTC

Undergraduate Research Project (Taiwan National Science and Technology Council), Advisor: Shih-Yi Chien, July 2026-Feb. 2027

- Participated as a core technical team member in an NSTC-approved undergraduate research project applying MR and AI interaction to reconstruct submerged cultural landscapes in Taiwan.
- Built an MR × AI cultural heritage project to digitally reconstruct a submerged Taiwanese village, enabling interactive exploration of historical environments through immersive visualization.
- Generated and optimized AI-based 3D models of village structures, adjusted generation parameters, and integrated assets into Unity for real-time MR scene development.
- Selected as a finalist in the 2026 NCCU AI Interdisciplinary × Sustainability Innovation Competition based on this project.

National Award Winner, University Division, National Humanities and Social Sustainability Action Innovation Competition, Advisor: Chih-Hsun Wu, Sep. 2025-June 2026

- Developed an AI-powered companion system to address the safety and emotional needs of elderly individuals living alone, focusing on proactive reminders, companionship, and location-based support in an aging society
- Five team members project; led product ideation and system design, and implemented end-to-end development including front-end/back-end architecture, Gemini API integration, Facebook dynamic token authentication, OpenStreetMap API, and Yating TTS API
- Delivered a working system demo and final presentation showcasing AI companionship and elderly safety applications; selected among 82 competing teams.

EXTRACURRICULAR ACTIVITIES

Marketing Director, NCCU Commerce Career Ambassador, Apr. 2024-June 2025

- Led a 4-member marketing team; managed IG/FB content strategy and cross-team coordination, designing and publishing 30+ posts (Adobe Illustrator), producing Reels with video editors, and managing accounts with ~1k IG and ~4k FB followers
- Organized the CCA Family event and helped organize 5 College of Commerce events; co-hosted 2 camp programs (~70–80 attendees each) for high-school exploration and underclassman academic/career orientation
- Served as MC for a 150-attendee session and delivered a departmental introduction for a 50-attendee College of Commerce briefing

SKILLS, CERTIFICATES

Certificate name: AWS Certified AI Practitioner, April 2026; Google Analytics Certification, May 2026

Programming: Python, Java, JavaScript, SQL, R, HTML/CSS

Language: Mandarin (native), English (fluent)
